

Index

This updating of the index covers the last year's issues of Appalachia, from August-September 1976 through June-July 1977 inclusive. Like previous indexes, this index is divided into three sections: a subject index, a geographical index and an author index. A colored dot following an entry indicates that this is a major article, not a short news story.

A composite index covering all issues through June-July 1977 is available upon request. Please fill out and mail in the coupon on page 44.
